

Simucube Mount

Simucube Mount is specially designed for Simucube 2 and other front-mounted Direct Drive wheelbases, offering racers the basic needs to get racing as easy as possible, with Simucube quality. With the adjustable design and ease of installation, the Simucube Mount facilitates multiple deck-mounting options compatible with most rigs and their existing mounting holes on the market today.

The Simucube Mount enables a 20° degree tilt angle for Simucube 2 Sport and Pro wheelbases and the maximum of 12.5° degree tilt angle for the Simucube 2 Ultimate wheelbase, if the rear of the Ultimate wheelbase touches the surface. Adjusting the tilt angle is quick and straightforward with screws included in the package. Find the list of screws included in the package below.

Made of a 3mm wide steel plate, the Simucube Mount is unbendable. During the development of the Simucube Mount it has gone through rigorous evaluation process and passed even the highest torque and force-demanding tests with flying colors. As a finishing touch, the Simucube Mount has been coated with industrial quality paint, iconic to Simucube brand.

SKU	Description	Price (VAT 0%)	MSRP Price
SCMOUNT	Simucube Mount	56,45€	70€
